EXPERIENCE

Evaratus AI (formerly Scaler AI Labs)

Feb 2026 - Present

Member of Technical Staff 2

- Designed and delivered **100+ RL environments** (UI, MCP, desktop, multi-app, and coding) for **3+ frontier AI labs**, supporting **\$100M in contracted revenue**.
- Tested and delivered large-scale changes across **400+ RL environments** through automated validation and coordinated rollouts.
- Built an RL quality assurance platform that runs health checks and feature flow verification in agentic sandboxes across 400+ environments, making them delivery-ready.
- Built the orchestrator for multi-app environments, bundling apps like Gmail, Slack, and Jira into one container with shared auth and grading, so agents can train on cross-app agentic actions.
- Built a task factory that generated **1,000+ coding RL tasks** from public and private codebases.
- Automate browser exploration and environment generation with agents, including coverage tracking and verification.
- Delivered a user productivity and task analysis platform for large-scale workflow analysis, owning web and desktop apps, ClickHouse pipelines, role-based access, and autoscaling AWS infrastructure.

Scaler by InterviewBit

Mar 2023 - Jan 2026

Software Engineer I

Jul 2024 - Jan 2026

- Owned full-stack CRM architecture and infrastructure replacing LeadSquared, cutting annual costs by **90% (INR 5.4 crore+)** with full team adoption in 4 months.
- Built Scaler's AI Mock Interview platform and other products serving a combined **100K+ daily users**.
- Implemented search over **3M+ leads** with OpenSearch, handling 100K+ monthly queries.
- Enabled 15+ concurrent IVR calls at under 800 ms average latency with voice agents.
- Built LLM call auditing that processes 10K+ calls/month at 94% precision.
- Increased sales practice **5x** and cut ramp-up by 6 weeks with a 40+ persona AI sales simulator.

Software Engineer Intern

Mar 2023 - Jul 2024

- Cut mentor no-shows from **11% to 3%** with Rails and React scheduling; won the Needle-Mover Award.
- Improved article delivery for 500K+ monthly active users with lazy loading and server-side pagination.

SCSET, Bennett University · Greater Noida, India

Sep 2022 - Jan 2023

Full-Stack Developer Intern

- Developed Django dashboards for university staff to track and review inter-school activity.

TECHNICAL SKILLS

AI & agents: Harbor, MCP, Playwright, OpenAI and Gemini APIs

Languages: TypeScript, JavaScript, Python, Ruby, SQL, C++

Frameworks: React, Next.js, Node.js, FastAPI, Ruby on Rails, Django, React Flow

Infrastructure: AWS, Docker, Terraform, GitHub Actions

Data & search: PostgreSQL, OpenSearch, ClickHouse, Redis

EDUCATION

Bennett University

Aug 2020 - Apr 2024

Bachelor of Technology in Computer Science · CGPA **9.8/10**, top 1% of the class of 2024
